Chapter 1

Introduction

1.1 Figures and Referencing

This section shows how to make figures and cross-reference them in the text. Figure 1.1 shows an important figure. It is not a most to use **\Cref{labelName}**; you still can use referencing using **Figure \ref{labelName}**. Both will have the same effect. Figure 1.2 uses the second referencing technique.

Lorem ipsum dolor sit amet, consectetuer adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetuer id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at,
Figure 1.1: Letter 'A' Sample Figure. $\sum_{i=0}^{1000} \prod_{j=1}^{300} i * j$
Figure 1.2: Letter 'B' Sample Figure. $\mathcal{B} = \{b_1, b_2, ..., b_n\}, |B| \geq 1$.

mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

1.2 Tables and Referencing

Tables are similar to figures. You reference them the same ways. Table 1.1 shows a simple table. Try to avoid using vertical line. Usually horizontal lines only used. You can also use `tabularx` to create your table, which give you a better way in controlling the width of your table. Example of using `tabularx` is shown in Table 1.2

Table 1.2: Table caption example using `tabularx`

header 1	header 2	header 3

Chapter 2

Section Leveling

This template inherits the `memoir` documentclass format. The available sectioning levels are:

- `part`. \part{Title}: I don't think this is needed for the thesis.
- `chapter`. \chapter{Title}.
- `section`. \section{Title}.
- `subsection`. \subsection{Title}.
- `subsubsection`. \subsubsection{Title}.
- `subsubsubsection`. \paragraph{Title}.
- `subsubsubsubsection`. \subparagraph{Title}.

Following is an example of these sections.

2.1   Sample Title

2.1.1   Sample Title

2.1.1.1   *Sample Title*

2.1.1.1.1   Sample Title

2.1.1.1.1.1   Sample Title

Chapter 3

Literature Review and Citations

You can cite articles with the `\citep{source:bibtex}` or `\citet{source:bibtex}` command (`\citet{source:bibtex}` is equal to using `\cite{source:bibtex}`). You should include the bibtex of your source in the **references.bib** file that exists in the main directory. Example of citation `\citep{source:bibtex}` citation is (Sultan, Ahmad, & Dimitriou, 2019). Example of citation `\citet{source:bibtex}` citation is Sultan et al. (2019). You can also use `\cite{source:bibtex}` which will be like this Sultan et al. (2019). For a single author papers the citation style will look like this Sultan (2019). If you check your file **references.bib** you will find a bibtex entry as follows:

```
@article{sultan2019container,
title={Container Security: Issues, Challenges, and the Road Ahead},
author={Sultan, Sari and Ahmad, Imtiaz and Dimitriou, Tassos},
journal={IEEE Access},
volume={7},
pages={52976--52996},
year={2019},
publisher={IEEE}
}
```

3.1 Citation Style

The default citation style is the APA which is like the one used in this document. that is using `\citep{source:bibtex}` or `\citet{source:bibtex}`.

3.2 Large number of authors

For example, this paper (Arnett et al., 1988) has many authors (more than 6). This template will automatically list the first six authors. This will be done automatically, **you need to change the last author name in the bibtex for et al.**.

3.3 Common Error

The most common error you may get for the references is due to missing the author or year fields in the bibtex item. Make sure all your references have author and year fields.
